Blood Bank of Alaska, Inc.

The Blood Bank of Alaska completed construction of its 11,000 square foot building in the summer of 1981. Although planned to accomodate growth and expansion, the building was primarily designed with the donors and the community in mind. Currently occupying the entire bottom floor, the Blood Bank can accommodate up to 175 donors a day. The ski lodge appearance of the facility, with open beamed ceilings, stone fireplace, and wood paneling provides a warm, non institutional atmosphere for the donors. The Blood Bank of Alaska was also designed to serve the community as a disaster facility, complete with its own power generation and water supply. In the event of a catastrophic emergency, it can continue to operate when little else can and provide a life giving service to the people of Alaska.

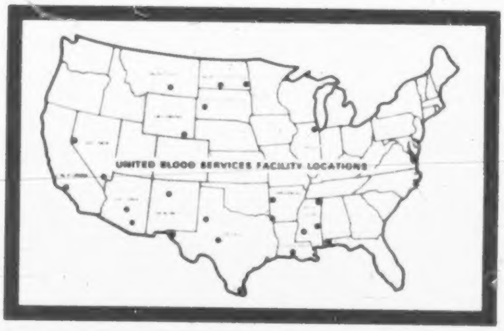
United Blood Services



Blood Systems, Inc. is a nonprofit [501(c)3] organization, licensed by the federal government. Founded in 1943, Blood Systems today encompasses a research foundation and three operating divisions, the largest of which is United Blood Services.

United Blood Services maintains community blood centers and satellite donor centers to serve some 900 hospitals in a geographic area covering one-third of the United States. These regional centers provide blood, blood components and a number of related services to more than 15 million people.

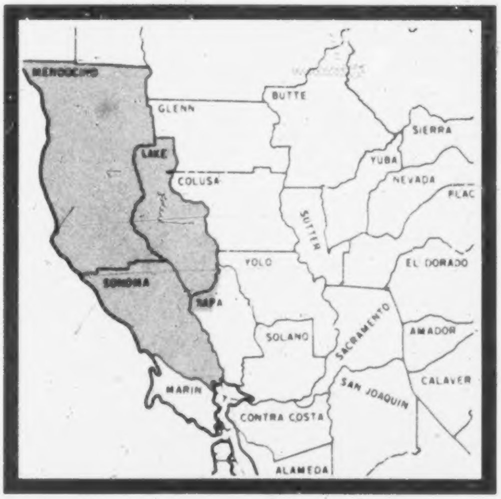
Blood Bank of the Redwoods



Blood Bank of the Redwoods' new facility features a red brick exterior and large amounts of glass which give a feeling of openness and light. The 13,540-square-foot building provides working space for 9 beds, four private history stations and expanded laboratory facilities. The building was designed to be open, inviting and comforting, not clinically intimidating to its blood donors. Yet it houses the most up-to-date equipment and allows for change and expansion in the years ahead.

Blood Bank of San Bernardino-Riverside Counties

The Blood Bank of San Bernardino Riverside Counties drew its first donor on June 9, 1951. Developed by the two County Medical Societies on the strength of contributions from member physicians, the Bank has grown parallel to the expanding population of the two counties and the 30 hospitals it serves. The Bank serves its community not only as its sole blood supplier, but as an educational and reference center as well, administering an SBB program, educational seminars and reference and HLA laboratories.

Stanford University Blood Bank and the Stanford Medical School Blood Research Facilities are located in the Stanford Medical School Blood Center. Stanford established its own blood program in 1978 in order to better meet the needs of its patients. This was particularly critical for the large numbers of premature infants, cancer patients and cardiac surgery patients who require specialized blood products. The Blood Center staff are nationally acknowledged leaders in developing and utilizing the most advanced techniques. A unique feature of the blood bank program is its integration into the Stanford Medical Center research programs. This benefits patients by providing direct and immediate application of important medical advances made by Stanford scientists and their colleagues. The Blood Center has had a directed donor program since 1983 and strongly encourages autologous donations for patients with a foreseeable need for transfusion.

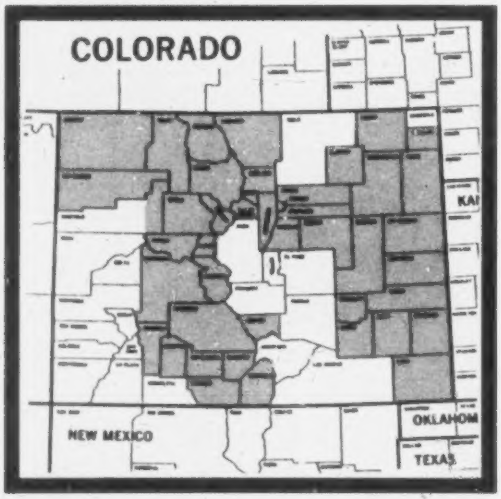
Belle Bonfils Memorial Blood Center



The Belle Bonfils Memorial Blood Center was officially opened February 27, 1943. In December 1945, it was reorganized and incorporated. In September 1945, it was designated the official blood bank of the Colorado State Medical Society. A small grant from Helen C. Bonfils made the establishment of the Center in memory of her mother, Belle Bonfils. It is nonprofit, self-supporting and the only community blood center in Denver and Colorado. Its set of basic goals are supply, quality, accessibility and efficiency. It provides products and services to more than 50 hospitals and more than 20 Alternate-Site Facilities in Denver and the state of Colorado.

Florida Georgia Blood Alliance

The Florida Georgia Blood Alliance, formerly the Jacksonville Blood Bank, began receiving donors on October 27, 1942. The FGBA was started by the Duval County Jacksonville Defense Council to support the military and civilian population during the war effort. Since the time of its founding, the FGBA, a non-profit organization, has provided all of the blood and related services to all of the hospitals in the Jacksonville area. The FGBA provides blood for hospitals in 6½ counties. The FGBA draws approximately 45,000 units of blood per year.

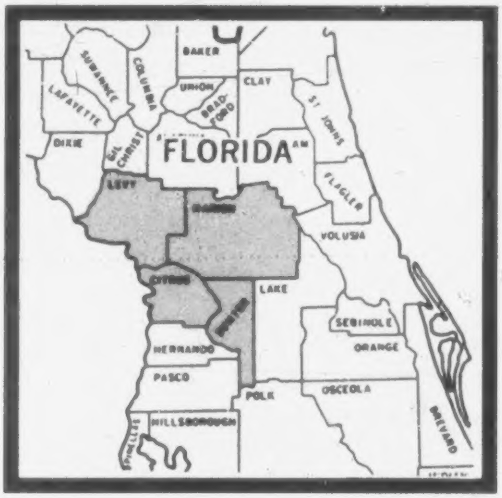
HAVE YOU?

Marion County Blood Bank, Inc.



The Marion County Blood Bank, Inc., is an independent "non-profit", "full service" blood bank that was established May 1, 1957, which continues to provide extensive services to our four county service area. In addition to donor recruitment and collection at our main complex in Ocala, Florida, our Citrus County Inverness Substation, and our active mobile unit, an ever expanding donor apheresis program is sustained. Providing blood and blood products represents only one aspect of the Marion County Blood Bank's committment to service. Our laboratory facility, located at our main complex, performs donor processing and component preparation, outpatient and reference testing services as well as providing comprehensive 24 hour regional compatibility testing to the hospitals and dialysis centers served. Specialized procedures are also available for hepatitis profile screening, parentage testing and histocompatibility testing. With consistent growth and increasing needs, the Marion County Blood Bank will diversify to meet those needs and continue to provide quality service to our service area.

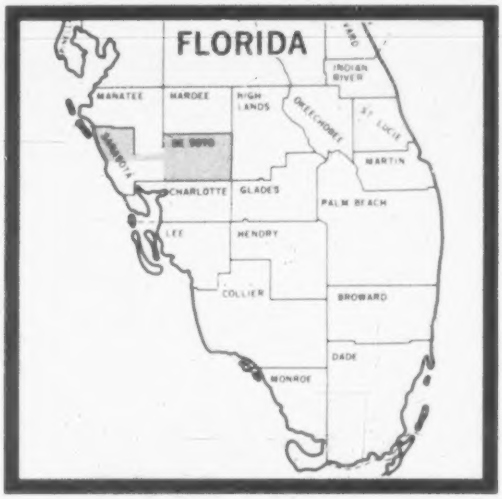
Sarasota Community Blood Bank, Inc.



Sarasota Community Blood Bank, Inc., formerly Lower West Coast Blood Bank, Inc., was founded in 1949. While the original concept of a regional blood bank serving the lower west coast of Florida did not fully flower, we have continued to serve the needs of local health care institutions for blood products and related services. Today, we are experiencing a tremendous surge in our population growth. As a consequence we foresee a continuing need for expansion and modernization of our facilities and services. We are pleased that our volunteer donors and our health care providers continue to consider Sarasota Community Blood Bank as the leader in area blood banking.

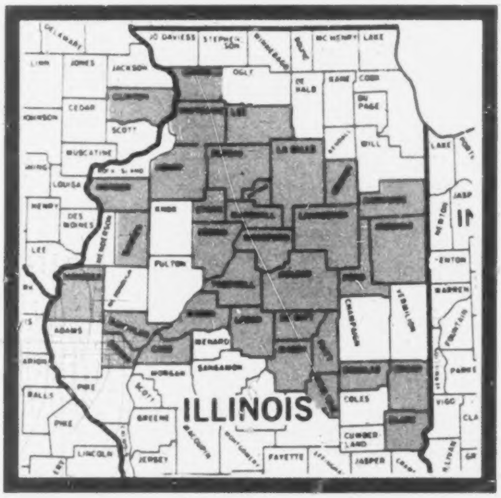
American Red Cross Blood Services, Heart of Illinois Region



The Heart of Illinois Region offers a full range of blood banking services to 45 hospitals. In addition to providing blood/blood products and laboratory services to hospitals, the region sponsors a comprehensive care hemophilia program to hemophiliacs throughout central and northern Illinois. The region also supplies physicians throughout the area with bone and other tissues used in transplantation. The region has a clinical laboratory license and performs various tests for hospitals and physicians.

Central Illinois Community Blood Bank

Springfield serves as the capital City of Illinois. It is a city of 95,000 people located in the geographic center of the state. The two major industries of the community are government and health care. The Blood Bank was founded in 1971 as a non-profit corporation to meet the entire blood service needs of participating hospitals. The hospitals served range in size from a 30 bed facility using 100 units of packed cells each year to an 800 bed urban medical center needing over 14,000 units of blood and 10,000 units of components annually.

Heartland Blood Centers

Heartland Blood Centers (formerly Aurora Area Blood Bank) was incorporated in 1943 to serve the hospitals in Aurora. Heartland Blood Centers has since grown to be a full service blood center providing all the blood needs for the patients in 26 hospitals west and south of Chicago. It has four subcenters in addition to the main center in Aurora. In 1988 the staff of 140 employees collected and processed over 73,000 units of blood.

Central Indiana Regional Blood Center, Inc.

The organization began in 1952 as the Community Blood Bank of Marion County, Inc., a 501(c)(3), not-for-profit, tax exempt corporation formed by pathologists and hospital administrators to serve as a clearinghouse for blood movement among the hospitals in Indianapolis. In 1964, we began actively recruiting blood donors and in 1973, because of added responsibilities, became known as the Central Indiana Regional Blood Center.

Governing Body
The Blood Center of Central Iowa is governed by a 52-member Board of Trustees. Each hospital serviced and certain civic organizations appoint a member to the Board. These members elect public members, who outnumber the appointed members by one. An elected executive committee of five provides the primary input to the staff concerning the Blood Center operations. All members serve without compensation.

Siouxland Blood Bank

The Woodbury County Medical Society and the Sioux City Hospitals sponsored the Siouxland Blood Bank in December, 1967, to serve the blood needs of the city. The Medical Director is a pathologist from one of the hospitals who assumes the post for two years. Over the years, we have supplied the 14 area hospitals and in 1984 moved to our larger present facility. In 1981, a pheresis program was implemented.

Nestled near the heart of the state capital and in the city's medical quarter, the Topeka Blood Bank provides 10,000 square feet of comfortable work space. The seven-bed drawing room contains a canteen and an alcove for aperesis. The one-story, wood and natural brick structure contains four medical history booths as well as two waiting rooms to handle days with especially high traffic. On premises labs are: infectious disease lab, component lab, reference lab and freezing lab. A continuing education conference room is available for meetings with blood bank associated groups. Offices and work stations fill in much of the remaining space. A small portion of the faciity is occupied by the Shawnee County Medical Society.

Camp Memorial Blood Center

The Camp Memorial Blood Center (CMBC) (formerly The Blood Bank Center) was dedicated on 12 July 1984 in the memory of COL Frank R. Camp, Jr., MSC, US Army retired. COL Camp was the first Director/Commander of this Center. CMBC is charged with the responsibility for the collection, processing, manufacture and distribution of blood products to military medical treatment facilities in the United States (including Hawaii and Alaska) and Panama. CMBC, founded in 1965, collects blood from military personnel, their family members and Department of the Army civilian employees at Fort Knox and Fort Campbell, Kentucky, and Fort Benjamin Harrison, Indiana.

Central Kentucky Blood Center

Central Kentucky Blood Center is a regional, non-profit, community blood center which serves approximately 900,000 people in Central, Eastern and Southeastern Kentucky. Since it was founded in 1968, CKBC has grown from serving one hospital to currently serving 54 hospitals and clinics.

Goal: To provide a safe and adequate supply of blood and blood components to patients in the most cost efficient manner.

The Blood Center for Southeast Louisiana

The Blood Center for Southeast Louisiana is a free standing 501(c)3 non-profit institution serving 44 hospitals in 13 parishes. During the past six years the blood center has made geat strides in developing a regional blood program in the Southeast Louisiana area. Whole blood collections have increased steadily each year from the 38,000 units drawn in 1980 to the 91,000 units drawn during 1988. In addition to blood collections, the Blood Center operates an AABB approved reference lab, a pheresis program and a long-term frozen blood program.

Louisiana Blood Center/ Blood Center of Southeast Texas

The Louisiana Blood Center
The Louisiana Blood Center was established in Shreveport, June 17, 1942, as the Shreveport Memorial Blood Bank with a grant from the Shreveport Chamber of Commerce and the endorsement of the Shreveport-Bossier Medical Society. In October of 1979, at the request of the local hospitals, additional centers were opened in Alexandria and Monroe. The Lake Charles Center was opened October, 1981. In 1986, the Pelican Tissue Center was formed to collect, process and distribute bones and soft tissue. In 1987, Blood Center of Southeast Texas in Beaumont joined Louisana Blood Center.

American Red Cross Blood Services, Southeastern Michigan Region

American Red Cross

The American Red Cross, Detroit Chapter, established the Detroit Community Blood Center in 1946 at the request of the community. The Chapter had opened the center during the war years for the collection of plasma needed by the Armed Forces and closed it in 1945 at the end of World War II. By 1953, the region had expanded to encompass five counties and was known as the Southeastern Michigan Red Cross Blood Services. Blood is collected at nine regional donor centers and 12 mobile units. The region is located in a major medical center for the state and provides blood services to 70 hospitals in the five counties it serves.

Community Blood Bank of the Lancaster County Medical Society

Community Blood Bank of the Lancaster County Medical Society
Community Blood Bank of the Lancaster County Medical Society was incorporated as a nonprofit organization in 1968. Total blood service for the community of Lincoln, NE, provided by volunteer donors was the goal and continues to be the primary objective of the blood center. Centralized recruitment, collection, processing and distribution along with other blood center functions has increased the size of the operation.

Salvage Plasma:	7,880
Non Inj:	1,873
Autologous:	2,038

Governing Body
The Regional Blood Services Committee has executive power with respect to all regional Blood Services matters, subject to the approval of the Board of Directors of the Syracuse & Onondaga County Chapter.

Association Membership
Blood Bank Association of New York State

Computer Services
National Red Cross Integrated Blood Information System run on HP 3000. System applications include laboratory and shipping, product management, and donor surveillance.

Research Projects
CMV Infection in Renal Transplant Patients; Detection of Antibody to CMV Early Antigens; Follow-up Study of Donors Reactive for HIV Antibody; Follow-up Study of Donors with Atypical HIV Western Blot Patterns; Evaluation of Assays for Anti-HIV Detection in Blood Donors; Surveillance and Evaluation of Blood Donors Positive for Human Immunodeficiency Virus (HIV) Antibody

New York Blood Center

NYBC operates four programs: The Greater New York Blood Program, which collects, tests, processes, and distributes blood an blood products to 250 metropolitan area hospitals; The Lindsley F. Kimball Research Institute, which pursues basic and applied research in transfusion medicine; Melville Biologics, a plasma processing and specialty biologics operation; and an Education Program for blood bankers, physicians, researchers, technicians, etc.

American Red Cross Blood Services, Carolinas Region

American Red Cross

Blood Services Carolinas Region collects an average of 1,150 units of blood a day to provide blood products to more than 90 hospitals in its 56-county area. Collection efforts are coordinated by blood services programs at 54 Red Cross chapters throughout the Carolinas region. Volunteer donors give blood at scheduled bloodmobiles (about 13 mobiles are in operation a day) and at fixed-site locations at each processing facility and in Raleigh. Although each blood donation is processed and stored for delivery at one of the three (3) processing facilities located in Charlotte, Durham and Winston-Salem, the testing and product management functions are centralized at the region's headquarters in Charlotte. An additional collection, storage and distribution operation is housed in Wilmington, North Carolina. The third largest blood region in the American Red Cross system, Carolinas Region is mainly supported by cost-recovery fees charged to hospitals.

The Northern Ohio Red Cross Blood Services was established in 1951 to serve an area of 15 counties and approximately 3.75 million people. Initially, the Red Cross Center provided approximately 50% of the blood needs in Cleveland hospitals and 100% outside of Cleveland with commercial banks providing the balance. Today, the Northern Ohio Red Cross Blood Services supplies 92% of the blood for Cleveland hospitals plus 98% of the blood and components for 37 regional hospitals. The region is supplied completely with blood from volunteer donors. The Northern Ohio Red Cross Blood Services offers a complete range of blood products and services, including reference lab, HLA lab, Bone Marrow Registry, Transplantation Services, an SBB program and numerous other educational offerings. The Blood Center is dedicated to serving all the transfusion needs of Northern Ohioans in accordance with the highest blood banking standards.

The American Red Cross Blood Services, Oklahoma Region, officially opened its doors January 11, 1949 in response to a request from the Tulsa County Medical Society. A non-profit agency, the primary objectives of the Oklahoma Region is to provide a safe, pure blood product for the patient and ensure the safety of the volunteer blood donor. It serves the communities and hospitals in central and eastern Oklahoma.

Lane Memorial Blood Bank

lane memorial
blood bank

Lane Memorial Blood Bank was established under the sponsorship of the Lane County Medical Society and incorporated February 24, 1961. Operations commenced July 1, 1961, with the purpose of providing blood and blood components for Lane County residents in the four area hospitals and one clinic. The blood bank has grown steadily and is now housed in a modern facility which was dedicated in 1978 and expanded in 1983 and 1987 to meet future needs.

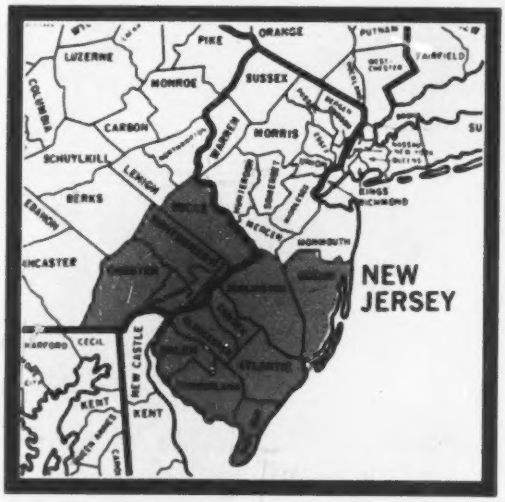
American Red Cross Blood Services, Penn-Jersey Region



Penn-Jersey Blood Services is the second largest program of the 56 regional blood centers in the Red Cross system. The Penn-Jersey Region is a not-for-profit blood service that has provided blood from an all-volunteer donor base since its founding in 1949. Ninety-eight percent of all blood and blood products used in the area's 96 hospitals is provided by the Penn-Jersey Region. The regional territory serves more than 5.5 million residents in Bucks, Chester, Delaware, Montgomery, and Philadelphia counties in southeastern Pennsylvania and Atlantic, Burlington, Camden, Cape May, Cumberland, Gloucester, Mercer, Ocean, and Salem counties in southern New Jersey. Headquartered in Philadelphia as part of the Southeastern Pennsylvania Chapter, the Penn-Jersey Region recruits blood donors through its 14 participating Red Cross chapters.

American Red Cross Blood Services, Western Pennsylvania Region

American Red Cross

The American Red Cross Blood Services, Western Pennsylvania Region was begun in 1950 at Beaver Valley General Hospital. As the region grew it became necessary to move to a building adjacent to the Beaver County Chapter of the Red Cross. In mid-1985 construction was completed on a new blood center facility in Brighton Township, PA in the Beaver County Health and Welfare Complex. A non-profit organization, it is supported by the American National Red Cross and provides services to 16 hospitals today.

Central Pennsylvania Blood Bank

The Central Pennsylvania Blood Bank is somewhat unique in that 55% of all bloods are drawn in our member hospitals. The remaining 45% is drawn in our bloodmobile units or one of two free standing satellite donor centers. However, we are responsible for 100% of the blood need 24 hours a day, 365 days a year. All donations at member hospitals become part of our master computerized donor call file, which is produced by blood type in order of date of donation. Each member hospital is inventoried twice daily and an anticipated outdate for the next eight days is obtained. Based upon this information, donors are sent to specific hospitals or satellite donor centers for specific needs. Blood is also moved from one institution to another by our courier to minimize outdate. We are also responsible for all public relations and recruitment of all blood donors for the area.

Blood Assurance, Inc.

Blood Assurance became fully operational in January, 1972, through the efforts of three organizations—the Chattanooga Jaycees, Chattanooga-Hamilton County Medical Society, and the Chattanooga Area Hospital Council. Having started as a supplemental supplier, with an administrative office only, it has been the sole supplier of blood products from volunteer donors since 1978, shortly after moving to the present center. Satellite donor stations and other services have been expanded over the years.

West Tennessee Regional Blood Center, Inc.

LIFELINE
Volunteer Blood Program

The predecessor, Jackson Blood Bank, was established in 1947 as a partnership venture. In 1972, it was sold to West Tennessee Regional Blood Center, Inc., a nonprofit corporation. FDA license has been continuous since 1949 at which time Jackson Blood Bank became an Institutional Member of AABB. WTRBC draws blood in seven counties, three on the community-responsibility philosophy. The credit system operates in all counties. LIFELINE, Volunteer Blood Program is the Blood Assurance Plan operated by WTRBC. In April, 1983 WTRBC moved into a new 13,450 square foot building.

Central Texas Regional Blood Center

The Central Texas Regional Blood Center is a non-profit regional blood center that was founded by the Travis County Medical Society in 1951. The blood center telephone recruiters provide 58% of the donors in the blood center. The Tissue Bank is active in the newly formed Central Texas Transplant Program. The blood donors in Central Texas are extremely big-hearted and respond immediately to our needs—especially in time of shortages.

American Red Cross Blood Services, Tidewater Region

American
Red Cross

Tidewater Regional Blood Services of the American Red Cross, located in Norfolk, Virginia, first began service in 1949 and is a member of the American Red Cross Blood Services network. The Tidewater Region is the sole provider, with the exception of the Navy, of blood and blood products for 2.5 million residents in southeast Virginia and northeast North Carolina. The region covers 63 counties and over 66,000 square miles and encompasses 56 Red Cross chapters.

Problem Crossmatch, Pheresis/Single Donor Products, HLA Typing and Antibody Screening, Red Cell Antibody and Antigen Identification, Therapeutic Phlebotomy and Pheresis, Coagulation Testing, Paternity Testing, Storing of Surgically Removed Bone

Area of Service
Counties (boroughs): 51
Hospitals: 58
Population: 1,872,964

Draw
1988 Draw: 71,941
Mobile Draw: 62.6%
1988 Outdate Rate: 2.6%

Donor Coaches
Five Bloodmobiles (1 ton trucks)
Self-Contained Unit by Barth
Self-Contained Unit by Bluebird
Self-Contained Unit by Ford

Components/Products Produced
Red Blood Cells: 70,132
Frozen Red Blood Cells: 189
Washed Red Blood Cells: 445
Platelets: 28,004
Cryoprecipitate: 4,964
Apheresis: 335
Fresh Frozen Plasma: 51,992
Recovered Plasma: 19,197

Governing Body
Governed by Western West Virginia Chapter Board. A Blood Services Committee, made up of Chapter members, physicians, medical care administrators and consumers, advises on all aspects of center operations and makes recommendation to the Board. Other advisory committees are medical and personnel.

The Blood Center of Southeastern Wisconsin

The Blood Center of Southeastern Wisconsin is a nonprofit service organization which provides all of the blood and blood components used by patients in 30 southeastern Wisconsin hospitals. The Blood Center also offers specialized laboratory services on a regional and national level and is recognized internationally as a leader in blood-related research. The Blood Center of Southeastern Wisconsin is affiliated with Blood Centers of America, the Medial College of Wisconsin and the Milwaukee Regional Medical Center.

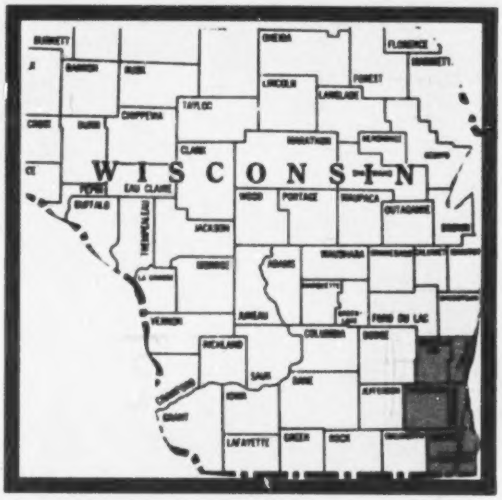
Full-time: 272
Part-time: 100

Finance
Fiscal Year: April-March 31
Budget: $19 million

Special Services
Autologous and Directed Donor Services; Bone Bank; Bone Marrow Donor Program; Education; Intraoperative Cell Salvage Program; Frozen Blood and Rare Donor File; Paternity Testing; Pheresis Program; Clinical Laboratories—Cell Marker Laboratory, DNA Typing Laboratory, Hemostasis Laboratory, Histocompatibility and Immunogenetics Laboratory, Platelet Antibody Laboratory, Reference Laboratory; Research Section—Hemostasis, Immunogenetics, Platelet Biochemistry, Thrombosis, and Transfusion Medicine.

Area of Service
Counties: 6
Hospitals: 30
Population: 1.6 million

Draw
1988 Draw: 123,212
Mobile Draw: 35.4%
1988 Outdate Rate: 1.4%



Components/Products Transfused
Red Blood Cells: 102,535
Frozen Red Blood Cells: 75
Platelets: 68,454
Cryoprecipitate: 10,682
Apheresis: 1,513
Fresh Frozen Plasma: 24,660
Recovered Plasma: 21,000

Governing Body
31-member volunteer Board of Directors

Association Membership
American Association of Blood Banks, Council of Community Blood Centers, American Association of Tissue Banks, Wisconsin Association of Blood Banks, Milwaukee Regional Medical Center

Publications
Blood Donor News, Research Newsletter, Annual Report, Computer Software Newsletter

Computer Services
SYSTEM—Blood Center management software available for license to regional blood centers.

Research Projects
Current areas of research conducted by a 45 member staff include: immunogenetics, thrombosis, platelet-biochemistry, and transfusion medicine.
